A tornado touched down in a corn field just to the east of Highway Z, half a mile north of CR 244. The tornado travelled to the northeast, flattening another corn field one mile north of CR 244 on CR 245. Also, nearby trees along the east side of CR 245 were snapped near the base of the trees and numerous large tree limbs were blown down. The tornado then lifted and dissipated.

A tornado touched down half a mile east of the intersection of Highway F and CR 255, about one and a quarter miles east of Woodland. Several trees and large tree limbs were blown down at this location. The tornado traveled to the northeast, damaging a machine shed near the intersection of CR 279 and CR 264. It continued to move to the northeast and skipped over a tree line before moving into the southern part of Palmyra where it damaged the Consolidated Machine & Welding Company on US Highway 61. Three of the four large corrugated steel buildings were severely damaged. One semi trailer was lifted and dropped onto 2 other trailers at this location. It then damaged a church and structures around the church. Further northeast a trucking company sustained minor building damage. From this point it crossed US Highway 61, where it picked up a car that was traveling south on the highway and flipped it twice. Fortunately the driver was wearing her seatbelt and only sustained minor injuries. It then caused additional tree damage a quarter of a mile northeast of the highway before lifting and dissipating.

MARION COUNTY --- 0.4 SW PALMYRA [39.80, -91.54], 0.4 E PALMYRA [39.80, -91.52]

The tornado initially touched down near the intersection of West Church Street and South Breckenridge Avenue with minor tree damage. As the tornado travelled to the east northeast, additional tree damage occurred in a residential area near the far western end of West Lafayette Street. The tornado then caused damage to 3 large corrigated buildings on South Bradley Street between West Lafayette Street and West Main Cross Street. Tree and power line damage was also observed in this area. The tornado caused minor roof damage to a store on Main Street before lifting and dissipating.

The tornado touched down near the intersection of CR 165 and CR 168. It travelled to the northeast destroying one outbuilding and damaging or destroying numerous trees. Also, the southeast corner of a hog confinement building was damaged, leading to a partial roof collapse. Some of the debris was thrown a third of a mile to the northeast. An unoccupied car was also damaged. The tornado lifted and dissipated on CR 160 about a quarter of a mile south of CR 164

A tornado briefly touched down around 5 miles south southeast of Hawk Point, near Big Creek on North Rock Church Road. It damaged half a dozen trees. The tree tops were sheared off with tree limbs up to 2 feet in diameter thrown in different directions.

A strong cold front moved through the region, triggering showers and thunderstorms. Several low-topped supercells produced 8 tornadoes and straight line wind damage from central and northeast Missouri to west central Illinois during the evening of October 2nd.
